

Camila Gaitán Mosquera

Experience

Jan 2016–Present

Founder • CEO • Ideas Up

- Guide technically our clients in Colombia who want to create their technology-based startup
- Create advice and training techniques in mobile development for our clients in Colombia
- Create solid architecture for mobile application
- Create solid mobile development process and good practices across teams
- Our Clients:
 - Ernest & Young Colombia,
 - Imaginamos
 - Entelgy Colombia

Jan 2018–Present

iOS Tech Leader • Engineering Manager • Merlin Jobs Inc

- Discuss with product about the new feature by sprint for the iOS application.
- Define the technical requirements of each story for better detail of the iOS development teams.

Calle 159 # 54-69
Bogotá, Colombia

+57 317 432 2368

Camila.gaitanm@gmail.com

www.camilagaitan.com

- Propose technical improvements in the code as code migration or refactoring practices
- Define good mobile development practices
- Define the architecture for each new feature within the application and its structure, e.g. the chatbot implementation within the mobile application
- Generate code review practices
- New feature implementation using the swift language

Jan 2018–Jul 2018

Intern • Data Scientist • Seguros Alfa Colombia

- Master's Thesis: Predictive model to determine the probability of change in the family structure of an insured

Oct 2016–Dec 2017

iOS Tech Leader • Senior iOS Developer • Meridian Group

- iOS development leader, responsible for creating good development and architectural practices. Product owner and technical advisor for startups in Silicon Valley
- Define good mobile development practices
- Define the architecture for each new feature within the application and its structure, e.g. the chatbot implementation within the mobile application
- New feature implementation using the swift language

Feb 2016–Sep 2016

iOS Tech Leader • Senior iOS Developer • VOIQ Inc

- Twilio implementation into the apps, also create unit testing coverage for legacy code

Calle 159 # 54-69
Bogotá, Colombia

Education

Universidad Libre de Colombia, Bogotá (2007-2013)
BS – Computer Science

- I was awarded a scholarship for 6 consecutive semesters for being the best average of the engineering faculty

Pontificia Universidad Javeriana, Bogotá (2016-2018)
Magister – Data Science and Analytics for Business intelligence

Communication

Software developer, around 8 years of experience in iOS, using development languages like Java, swift and Objective-C, always using multi- tier architecture, M V VM, Clean Architecture SOLID principles, Object-oriented programming and design patterns. Besides that, I have experience in Python related to data science with frameworks like Social Network Analysis with networkx, scikit-learn, Clustering, PCA, Pandas and Spark. In database, I have experience working with PostgreSQL and MongoDB. My aspects of professional ethics are honesty, commitment, loyalty, responsibility, teamwork capacities, ability to deal with conflicts, high capacity of adaptability, ability to work under pressure and Client Management.

Technical Skills

(8+ years): Objective-C and Git.
(2+ years): Swift, Python, Java, Machine learning (regression, SVM, neural networks, time series and other classic models)
(1+ years): Deep Learning (Convolutional neural networks)

Leadership

Codies: Foundation that supports women in technology in Colombia (codies.org)

Principal Chair Latinity Colombia: Women in Technology
Conference for Latin America

IOS Colombia. Organization that supports workshops on iOS
technologies

Languages

English – Upper Intermediate
Spanish - Native
